## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13 and 26, drawn to a method of applying a wear resistant coating material to a surface of a piston ring.

Group II, claim(s) 14-18 and 20-25, drawn to a piston ring.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: For the piston ring of group II the coating can be applied by a different method other than thermal spray for example a bath or vapor diffusion or other. For the group I the coating can be placed on piston or cylinder bore or other surfaces.

3. An attempt to contact applicants' representative was made 10/12/05, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
